Investment Strategy and Origination Platform

Investment Strategy Targeting Senior Loans

FLOATING RATE FIRST MORTGAGE LOANS PROVIDE EXPOSURE TO COMMERCIAL REAL ESTATE SECTOR AT AN ATTRACTIVE POSITION WITHIN A PROPERTY'S CAPITAL STRUCTURE

- Our senior loans are senior to a property owner's significant equity investment.
- The borrower's equity investment usually provides a credit support cushion of 25-35% of a property's value.
- Focused approach to direct originations and intensive credit underwriting creates attractive first mortgage loan investments with downside protection.
- Prioritizing lending on income producing, institutional-quality properties produces cash flow coverage for our loans and generates attractive risk-adjusted returns on our investments.

ILLUSTRATIVE PROPERTY CAPITAL STRUCTURE

Target Investments and Portfolio Construction

THE COMPANY HAS A SUCCESSFUL INVESTMENT PHILOSOPHY THAT HAS BEEN TESTED THROUGH MULTIPLE ECONOMIC, INTEREST RATE AND REAL ESTATE CYCLES

KEY TENETS OF STRATEGY

- ✓ Long-term, fundamental, value-driven philosophy avoiding “sector bets” and “momentum investments”
- ✓ Emphasize durable and identifiable cash flow rather than sale value of collateral property by lending on income-producing, institutional-quality real estate
- ✓ Intensive, multifaceted credit diligence through bottom-up underwriting and prioritizing high-quality, well-capitalized and experienced sponsors
- ✓ Thoughtfully structured loans that provide downside protection; the property is the collateral, but the loan is the investment
- ✓ Active balance sheet and liquidity management; moderate leverage and maintaining access to a diverse set of funding sources while prioritizing stability of non-mark-to-market financing

PORTFOLIO CONSTRUCTION

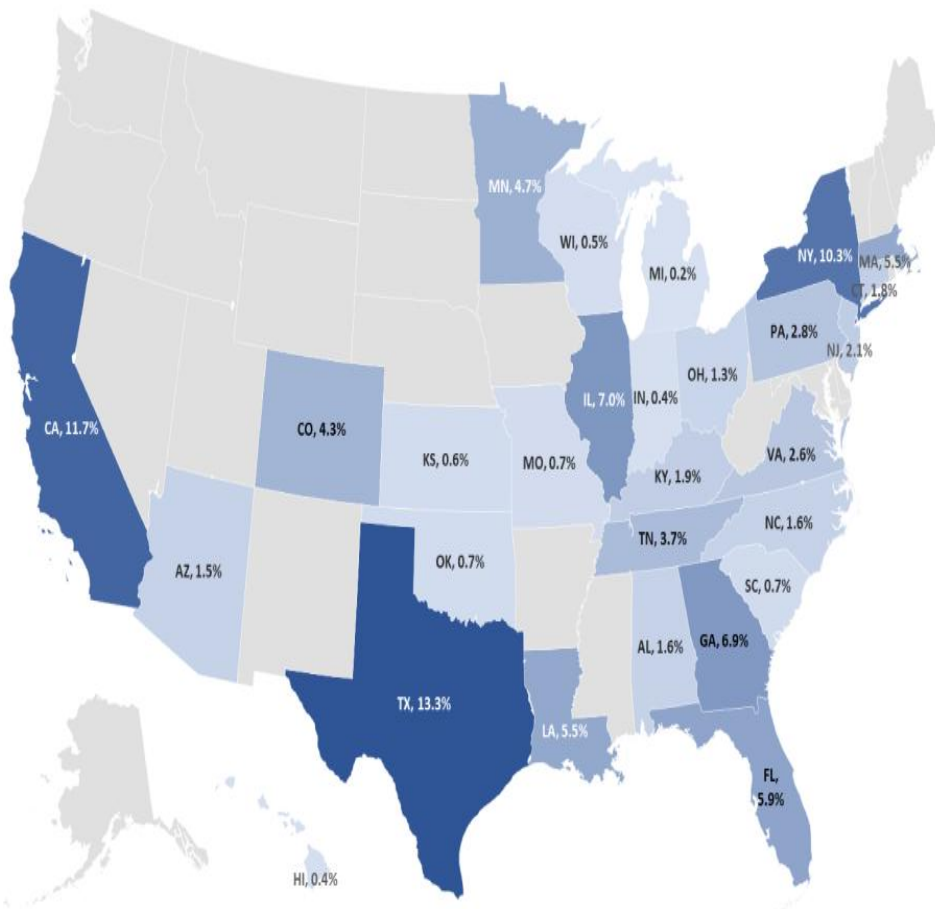

- ✓ Nationwide portfolio constructed on a loan-by-loan basis emphasizing diversification by property type, market and sponsorship
- ✓ Floating rate first mortgage loans secured by income-producing U.S. commercial real estate
- ✓ Loans of \$20 million to \$150 million secured by a variety of asset types (primarily multifamily, office, warehouse/industrial, self-storage, and others)
- ✓ Transitional properties located in the top institutional markets across the U.S. with strong economic, demographic and real estate fundamentals
- ✓ Stabilized LTVs* generally ranging from 55% to 70%
- ✓ Generally target loan yields of SOFR + 3.0% to 5.0%+
- ✓ Sponsorship, business plan and loan terms are key considerations in addition to the quality of property collateral, demographics and geographic location

* See definition in the appendix

Distributable Earnings

- Beginning with our Annual Report on Form 10-K for the year ended December 31, 2021, and for all subsequent reporting periods ending on or after December 31, 2021, we have elected to present Distributable Earnings, a measure that is not prepared in accordance with GAAP, as a supplemental method of evaluating our operating performance. Distributable Earnings replaces our prior presentation of Core Earnings with no changes to the definition. In order to maintain our status as a REIT, we are required to distribute at least 90% of our taxable income as dividends. Distributable Earnings is intended to over time serve as a general, though imperfect, proxy for our taxable income. As such, Distributable Earnings is considered a key indicator of our ability to generate sufficient income to pay our common dividends, which is the primary focus of income-oriented investors who comprise a meaningful segment of our stockholder base. We believe providing Distributable Earnings on a supplemental basis to our net income and cash flow from operating activities, as determined in accordance with GAAP, is helpful to stockholders in assessing the overall run-rate operating performance of our business.
- We use Distributable Earnings to evaluate our performance, excluding the effects of certain transactions and GAAP adjustments we believe are not necessarily indicative of our current loan portfolio and operations. For reporting purposes, we define Distributable Earnings as net income attributable to our stockholders, computed in accordance with GAAP, excluding: (i) non-cash equity compensation expenses; (ii) depreciation and amortization; (iii) any unrealized gains (losses) or other similar non-cash items that are included in net income for the applicable reporting period (regardless of whether such items are included in other comprehensive income or in net income for such period); and (iv) certain non-cash items and one-time expenses. Distributable Earnings may also be adjusted from time to time for reporting purposes to exclude one-time events pursuant to changes in GAAP and certain other material non-cash income or expense items approved by a majority of our independent directors. The exclusion of depreciation and amortization from the calculation of Distributable Earnings only applies to debt investments related to real estate to the extent we foreclose upon the property or properties underlying such debt investments.

Distributable Earnings (cont'd)

- While Distributable Earnings excludes the impact of the unrealized non-cash current provision for credit losses, we expect to only recognize such potential credit losses in Distributable Earnings if and when such amounts are deemed non-recoverable. This is generally at the time a loan is repaid, or in the case of foreclosure, when the underlying asset is sold, but nonrecoverability may also be concluded if, in our determination, it is nearly certain that all amounts due will not be collected. The realized loss amount reflected in Distributable Earnings will equal the difference between the cash received, or expected to be received, and the carrying value of the asset, and is reflective of our economic experience as it relates to the ultimate realization of the loan. During the three and nine months ended September 30, 2022, we recorded provision for credit losses of \$(35.4) million and \$(52.8) million, respectively, which has been excluded from Distributable Earnings consistent with other unrealized gains (losses) and other non-cash items pursuant to our existing policy for reporting Distributable Earnings. Pursuant to our existing policy for reporting Distributable Earnings, during the nine months ended September 30, 2022, we recorded a \$0.5 million recovery of amounts previously written off in a prior period on a discounted payoff. Additionally, during the nine months ended September 30, 2022, we recorded a \$(10.1) million write-off on a loan sale, which we included in Distributable Earnings because we did not collect all amounts due at the time the loan was sold. During the nine months ended September 30, 2022, we recorded a \$(18.8) million, loss on early extinguishment of debt, which has been excluded from Distributable Earnings consistent with certain one-time expenses pursuant to our existing policy for reporting Distributable Earnings as a helpful indicator in assessing the overall run-rate operating performance of our business.
- Distributable Earnings does not represent net income or cash flow from operating activities and should not be considered as an alternative to GAAP net income, or an indication of our GAAP cash flows from operations, a measure of our liquidity, or an indication of funds available for our cash needs. In addition, our methodology for calculating Distributable Earnings may differ from the methodologies employed by other companies to calculate the same or similar supplemental performance measures, and, accordingly, our reported Distributable Earnings may not be comparable to the Distributable Earnings reported by other companies.
